

European Union Directive Related to Registration, Evaluation, and Authorization of Chemicals (REACH)

Declaration Statement

Detoronics, to the best of our knowledge, does not currently manufacture nor import any chemical substances into the EU on their own or in articles within products in quantities of 0.1% weight by weight (w/w).

In addition, imported Detoronics products (articles) do not contain chemical “Substances of Very High Concern” (SVHCs) intended to be released during the normal and reasonably foreseeable conditions of the product’s use as defined by the REACH regulation and existing guidance of 241 substances, with the latest substance additions, as per the ECHA List updated on 27 June 2024. Thus, Detoronics does not currently have a direct REACH obligation to pre-register substances.
